BRIEF ABSTRACT OF LETTER

Submits for sanction a revised estimate amounting to 55848/- for improving the Sambe Honda at Chittaldrug and requests that the additional sum of Rs 3848/- now required may be met from the L.F. Genl: or Provincial Funds

NOTES AND ORDERS

T

The Executive Engineer's report accompanying the revised estimate explains the nature of the work clearly. The original estimate of Rs 20000/- was sanctioned from the Local Funds General. The Dy. Comr.

Notes—First sheet

GPB—0000—1107

Serial No

requests that, regard being had to the low finances of the Chitaldrug Mun. Municipality, the additional sum of Rs 3848/- required to complete the work according to the present estimate may be sanctioned from the L F General or the State Funds

2 The financial condition of the Municipality as per current year's budget is as follows

Opening balance (actual)	= 604.
Probable receipts	= 10242
Total	= 10846
Probable expenditure	= 8617
Closing balance	2229

This is less than the prescribed minimum balance by Rs 331/- It is also understood that a sum of Rs 78,245/- is estimated to remain at the Credit of the L F Genl. at the end of the current year

3 The present estimate provides for a parapet wall of burnt stone in mud all round the Honda (Cost Rs 697) In June 1909, the Sanl. Commr. reported that, should there be a good shower in the Honda all that would

17 *Submitted to His Highness*

I submit for information the accompanying file of papers relating to a revised estimate amoun ing to Rs 5,848 for the improvement of the Santhe Honda at Chitaldurg town, for the supply of drinki water to the townspeople of Chitaldurg. I submit these papers as the matter is of some importance involves the grant of a loan of Rs.3,848 to the cipality. A sum of Rs 2,000 has already been tioned as a grant-in-aid to the Municipality as a special case in Proceedings No.1558-78/L.B. dated 12th August 1909.

I

2. The action proposed to be taken is indi ed in the order of Government No.5905-7/M1. dated the 14th instant.

ml 84-09
SL-S-

I have the honor to submit the estimate for Rs 5,848/- for improving Sauthe Honda at Chittaldrug The sketch accompanies the estimate gives clearly the reasons for the revision of original estimate and the real necessity completing the work now in full during the strong representation of the Municipal and the Sanitary Commissioners, Government was pleased to sanction of Rs 2,000/- for clearing the silt the Local Funds General If only a of the silt is cleared, it will serve purpose The amount already

SLT

filthy water will accumulate on
of principal streets and make the ne
-ighbourhood quite unhealthy as before. If on
other hand, the silt is entirely removed, the pond
fill with potable water and supplement
present insufficient supply of water to
town especially in the hot weather

2 The Immunamankenkare
perfectly dry and water to be
drawn from the Waddie for a limited
hours every day and portions of the
supplied by turns to the wells in
parts of the town are already running
people will feel the water differently
Keeping in the course of a month or so
by that time, this Honda is cleared,
be a great boon to the townspeople As
Government is fully aware of the
bankrupt state of this Municipality
would earnestly solicit the
additional allotment of Rs 3,848/- from
Local Funds General or Provincial

3 As the work is now in full
orders are solicited by wire to
the work pending formal sanction.

Deputy Commissioner's Office,

2

Washers will disappear and collecting them again and the necessary of the pumping machinery will take up a lot of space and will not only result in the waste of funds but also prove an obstacle to the supply of pure drinking water to the townspeople when it is most needed

Early orders are solicited

I have the honor to be,

Sir,

Your most obedient - servant,

Work being Comp by the end of February 1911
en, it is feared, Water Scarcity will be felt Rather
by in Chitaldroog town The work Can not be
the middle as it would Cause much trouble and
any expenditure If the Well is not fully
money now spent by Rs 2000/- will be a mere
Waste as the water will not become pure and useful
Request that the Deputy Commissioner will
represent to the Government and the Chief
to grant immediately further funds
other points have been detailed in the report

Executive Engineer,
Chitaldroog Division.

Report to accompany the estimate
Improving the Santhe Honda at Ishtaldroog

Santhe Honda is Situated
the fort at its northern side, at Ishtaldroog
It is a very fine large Square well At top
it measures 200'x200' It is said to have
built at the time of the old Ishtaldroog
Pallegars about three hundred years
As far as the enquiries made upto now,
was not possible to obtain any definite
ation as to the exact date of Construction
and in which Pallegars time it was
commenced and in whose time it
completed Any how, one thing can be
with certainty the Well was not
even once after its Construction
seventy and eighty years old as
they have not seen the well from
any time during their lifetime
2/ The well is throughout lined with
-cut stone steps with thread
1ft and rise 9" and with a broad 2ft
at every 12, 10, 9 steps The lining as
it is exposed now, so intact and

supply & pumps. He despatched a 10 H P,
Vertical boiler and a 5 pumps with
necessary pipes and bends for steam,
suction, delivery &c which arrived on the
4th November/09 with a driver and a fireman
On the 5th idem the work of preparing beds for
fixing the boiler and pumps were Commenced
and got the whole machinery erected
and fitted up Conveniently under my
personal supervision by the 17th idem
On the 18th, pumping was regularly Commenced
the making pukka arrangements for all
further requirements. The Water which
was at 28th nine inches steps or 21 feet below
the ground level, was pumped out Completely
by 5th December/09 ie in 18 days. The
depth of Water thus removed was 12 ft
over an area of $\frac{140+114}{2} \times \frac{140+114}{2} = 16129$ Sft or
548 cft at an average 10,753 cft per day
8 working hours. The silt that was lying
the steps in a slope was removed then
there as it became exposed as Water
pumped out

At the 44th step or 33 ft below the ground
one homogeneous mass of slush was

The depth was tested by means of iron rods upto very nearly to the centre the Well It has been found out to about 28 feet deep It Can not be made out exactly at what length and the stone lining at bottom is closed It been assumed to be 40 by 40 by on the depth ascertained upto now the quantity of silt to be cleared a great depth Comes to about $\frac{111+40}{2\times3} \times \frac{44}{2\times3}$ = 6150 Cubic yards which at an rate of 0-8-0 per cyt Comes to Rs 30 transporting charges of pumping and pumping charges till the Work is to Rs 1250/-, Constructing a burnt mud parapet all round three feet with Concrete Coping and chunam to Rs 773/- to prevent danger to the and Washing in of the silt from all Runs approximately, in and establishment Charges of 7 a sum of Rs 5848/- is required to Complete the clearing of the Well

9/ how the work is being Carried by amain agency in the cheapest Way It is not Convenient to give the Work on Contract as no Rate Can be

on

benefitted by this Well Water
13
for drinking purpose when Water
city is at its highest To avoid
this trouble, therefore Request
mediate orders to Carry on
Work to Completion pending
of the accompanying
